DETAILED ACTION

This Office action is in response to applicant's amendment filed on 4/12/2008.

Status of Claims

Claims 1-15, 18 and newly filed claims 19-20 are pending.

Claims 16-17 have been cancelled.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15, and 18-20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-18 of copending Application No. 10/476,205. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the features of the instant application are included within the copending application such as a cladding member including a body portion with inner and outer surfaces and the inner surface further

comprises mounting means. For example, the copending claims 3-15 and 17 are corresponding to the instant claims 1-15, 18-20 except for obvious terminology variations: a body portion (copending claim 3) for an elongate body member (instant claim 1); a batten engagement portion disposed on said inner surface (copending claim 3) for mounting means associated with at least one of said adjacent cladding portions and adapted to engage at least one complementary mounting portion provided on said inner surface (instant 10). This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments with respect to claims 1-15 and 18-20 have been considered but are moot in view of the new ground(s) of rejection.
